## Important Information

*This fund is an interval closed-end fund. The Fund is an appropriate investment only for those investors who can tolerate a high degree of risk and do not require a liquid investment. The Fund does not intend to list the Shares on any securities exchange and the Fund does not expect a secondary market in the Shares to develop. Because you will be unable to sell your Shares or have them repurchased immediately, you will find it difficult to reduce your exposure on a timely basis during a market downturn. All or a portion of an annual distribution may consist solely of a return of capital (i.e., from your original investment) and not a return of net investment income. The Fund has limited operating history and the shares have no history of public trading. The Fund is classified as "non-diversified" under the Investment Company Act. As a result, it can invest a greater portion of its assets in obligations of a single issuer than a "diversified" fund. The Fund may therefore be more susceptible than a diversified fund to being adversely affected by a single corporate, economic, political or regulatory occurrence.*

*Although the Fund does not intend to invest in companies for the purpose of effecting change or influencing or controlling management itself, the Fund invests in companies that the Adviser believes have potential for capital appreciation resulting from such changes. The Adviser's evaluation of companies may prove incorrect, or the efforts which they invest may not be successful, or even if successful, may have unintended effects or cause the Fund's investment to lose value. The Bloomberg U.S. Treasury Index measures U.S. dollar-denominated, fixed-rate, nominal debt issued by the U.S. Treasury. Treasury bills are excluded from this index.*
